

TECHNICAL INFORMATION SCREENING COPY FORMAT: “DIGITAL SCREEN” / Online Edition
And as a backup for the DCP / the source file for creating a DCP

General Specifications:

- Colour Space Rec 709, Audio Levels EBU 128.
- Please make sure your files do not contain any textless materials (e.g. neutral titles after the program), no advertising breaks or color bars, but only the film itself, starting with the first frame of the program.

Video Codecs	Preferred: Apple ProRes 422 HQ, MXF (OP1a, Mpeg2 50 MBit) and DNxHD 185 accepted for uploads with lower bandwidths: H.264, 20 Mbit
	Other supported formats: Apple ProRes 422, XDCAM SD, XDCAM HD, XDCAM EX, XDCAM HD422
Audio Codecs	Preferred: PCM
	Other supported formats: AC-3, MPEG-2 Audio
Muxed/Container Formats	Mpeg, MOV, MPEG-2 Transport Stream, Material Exchange Format (MXF OP1A, H264/MPEG2 and PCM Audio)
Audio general info	2.0/LtRt/Stereo mix is mandatory. 5.1 mix is recommended additionally. Delivery either embedded in video file as discrete channels/separate streams per channel or as separate multichannel audio streams per mix (wav, mov, aif). Please provide information on audio mapping in an additional document or your naming convention. Audio of additional language versions may be delivered as separate file(s) as well.
Frame Rate	The same rate at which the video was produced. Accepted frame rates are 24, 23.98, 25, 29.97 or 30fps. Constant Frame Rate only.
Bit Rate	For 1080p, 50Mbps
	For 720p, 30Mbps
	For SD, 15Mbps
Interlacing	If your video is interlaced, deinterlace it before uploading to avoid jagged lines during playback. If the video was produced as progressive, upload it as it is.
Keyframes	Set to automatic.
Pixels	Encode using isomorphic (square) pixels (1 x 1). Although, this is usually the default video software setting, adjusting to 16:9 might unknowingly change the encoding to (rectangular) anamorphic pixels.
Video Resolution	1920x1080p (or lower, if resolution is lower).

Audio Bitrate	PCM
Subtitles	Supported formats: .SRT, .VTT, .STL, XML Please deliver an individual file per subtitle version. No HTML TAGS are currently supported. The subtitle file has to be in sync with the delivered video file and start at the exact same entry point, so no starting with 10:xx:xx:xx or 01:00:00:00
Graphic Elements	Films: 1 poster (.JPG, .PNG); minimum resolution 720x1080 – aspect ratio 2:3 1 Season background image - min. resolution 1920 x 1080 – 16:9 1 Hero slider image 1920 x 686 - 14:5 1 - 5 stills (.JPG, .PNG); minimum resolution 1920 x 1080 – aspect ratio 16:9 TV Shows: 1 Season Poster 720x1080 and one Cover image - minimum resolution 1000 x 750 –aspect ratio 4:3 1 Season background image - min. resolution 1920 x 1080 – 16:9 1 Episode Poster/Cover image - min. resolution 896 x 504 – 16:9 1 Hero slider image 1920 x 686 - 14:5
Meta Data	IMDb url, original title, international title (if applicable), Film or Serial, logline (max. 150 characters) and synopsis (max. 500 characters), production countries, genre(s), year of production, age rating(s), cast & crew (director, scriptwriter, DOP). XLS/XLSX preferred, iTunes or Amazon metadata are accepted as well.

Upload to our secured sFTP - Server until March 31st 2025:

Server: <sftp://rhi-media.dyndns.org>
 User: DOKfest-2025_Upload
 Password: RBfM9MFTuUfPUWvj
 Port: **5008**

Please use a free client tool e.g. Filezilla or Cyberduck. Access to the FTP - server is NOT possible via browser!

Upload to our Filemail-Account: <https://rhi-media.filemail.com/>

For any questions concerning technical aspects, please contact **Robert Hoelzel**: technik@dokfest-muenchen.de

If you have your screening copy already online (Filemail, GoogleDrive, FTP etc.), we are happy to download it from there. In this case, please send the download information to technik@dokfest-muenchen.de as well.
